Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Structural Growth Portfolio

a sub-fund of Fidelity Investment Funds III

Fidelity Structural Growth Portfolio JMA Accumulation Shares (ISIN:GB00BP4T3194)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: This Fund aims to increase the value of your investment over a typical market cycle of 5-7 years.

Investment Policy: The Fund provides global exposure by investing at least 50% into funds (including those operated by Fidelity) which may be index tracking funds or actively managed funds. The Fund has a large exposure (at least 80%) to higher risk investments in (such as global equities, commodities (such as through funds investing in gold) and alternatives (such as through funds investing in infrastructure and real estate) meaning at it is likely to experience short-term price fluctuations in line with these markets and an investor may not get back the full amount invested. The Fund provides exposure to market themes that benefit from long term (structural and not cyclical) economic or social trends, such as disruptive technologies that modify consumer behaviour, demographics (population growth, ageing and middle class growth) and climate change. Theme analysis includes macroeconomic analysis and on the ground research combining a wide range of inputs to determine expectations for the behaviour of asset classes over a range of time horizons.

The Fund can also invest directly into transferable securities, money market instruments, cash and deposits, and is also able to use derivatives.

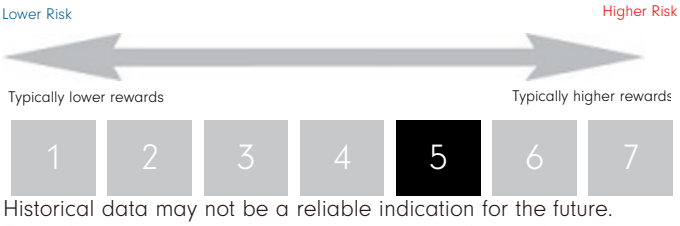

Investment Process: The fund is actively managed without reference to a benchmark and has full discretion in its choices of investments within its objectives and policies.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment. The fund may also use derivatives with the aim of achieving the investment objective.

Additional Information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund.

Base Currency: GBP.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.The fund may be exposed to the risk of financial loss if a counterparty used for derivative instruments subsequently defaults.

Fidelity INTERNATIONAL

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.65%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

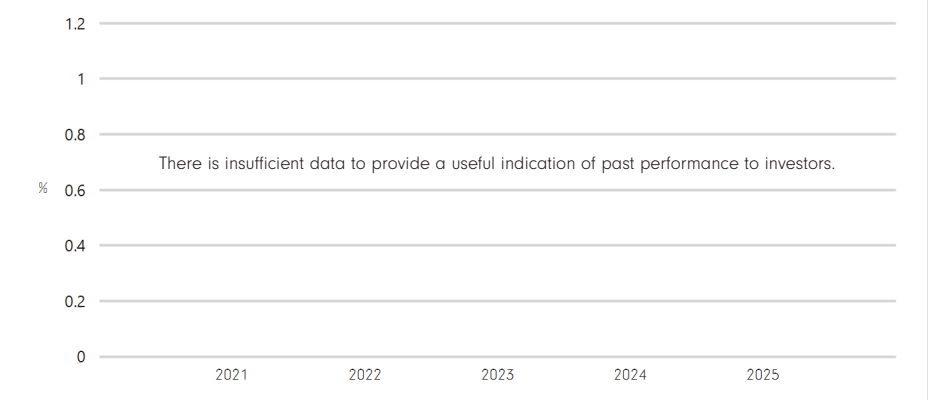

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund and the class were launched on 9 January 2025.

Past performance has been calculated in GBP.
