This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Sustainable Multi Asset Balanced Fund

a sub-fund of Fidelity Investment Funds IV

Fidelity Sustainable Multi Asset Balanced Fund W Accumulation Shares
(ISIN:GB00BLH23283)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The Fund aims to increase the value of your investment over a typical market cycle of 5-7 years.

Investment Policy: The Fund will obtain at least 70% exposure to investments with sustainable characteristics. All of the Fund's holdings will adhere to Fidelity's Sustainable Family exclusion policy.

The Fund provides global exposure to a diversified range of assets by investing at least 70% into funds managed by Fidelity which invest in a mixture of asset classes (including equities and bonds). The Fund can also invest directly into other collective investment schemes.

The Fund will actively allocate to, and within, different asset classes and geographies based on their potential to generate growth or reduce risk or volatility within the overall portfolio. Asset allocation exposure of the Fund will be actively managed within the following parameters: 40-60% equity, 30-50% debt instruments (which may include high yield and emerging market debt), 0-20% cash and 0-15% alternatives (such as infrastructure securities and Real Estate Investment Trusts).

Investments with sustainable characteristics are those which the Investment Manager believes consider effective governance and management of environmental and social issues and deliver long-term sustainable outcomes through positive societal impact. Such investments are identified through Fidelity's Sustainable Investing process, which evaluates and monitors for robust sustainable credentials, and is built on three related elements; integrated ESG analysis, engagement, and collaboration.

Sustainable characteristics based on environmental, social, and governance considerations are analysed by Fidelity and principally assessed based on criteria such as but not limited to, climate change mitigation and adaptation, water and waste management and biodiversity, product safety, supply chain, health and safety and human rights. The sustainability assessment is applied to the issuer of an investment, but the significance of the above factors may vary between issuers in different sectors according to their economic activity. For instance, for this Fund where the asset allocation has exposure to issuers across a wide range of economic sectors and asset classes, a wide range of sustainable characteristics will be relevant. These may include corporate governance malpractices, shareholder rights, climate threats, brand and reputational issues, supply chain management, and work practices.

The Fund can also invest in transferable securities, money market instruments, cash and deposits, and is also able to use derivatives for efficient portfolio management and investment purposes (but not on any significant basis).

Investment Process: The fund is managed without reference to a benchmark and has full discretion in its choices of investments within its objectives and policies.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment. The fund may also use derivatives with the aim of

achieving the investment objective.

Additional information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average. The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall. Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.50%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 31/10/2023. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund and the class were launched on 10 June 2021.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '**' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

Practical Information

Depositary: JP Morgan Europe Limited.

This key information document describes a sub-fund of Fidelity Investment Funds IV (the "Fund"). The prospectus and periodic reports are prepared for the entire Fund.

For more information, please consult the prospectus and latest reports and accounts which may be obtained free of charge in English from FIL Investment Services (UK) Limited. These documents and details of the remuneration policy are available via www.fidelityinternational.com.

The tax legislation in United Kingdom may have an impact on your personal tax position. For further details you should consult a tax advisor.

FIL Investment Services (UK) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus of the fund.

The Net Asset Value of the fund is available at the registered office of FIL Investment Services (UK) Limited, and at www.fidelityinternational.com.

The assets and liabilities of the fund are segregated by law from those of other sub-funds and there is no cross-liability among the sub-funds.
