Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity ProsperityShield Fund

a sub-fund of Fidelity Investment Funds VI

Fidelity ProsperityShield Fund FC-INC-GBP
(ISIN:GB00BTXWY580)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The fund aims to increase the value of your investment over a period of 5 years or more.

Investment Policy: The fund provides global exposure to a portfolio of assets which can include bonds, cash, commodities (e.g. gold) and equities. The combination of assets can be achieved via direct investment and/or through investment into funds (including those operated by Fidelity) which may be index tracking funds or actively managed funds. The fund has exposure of at least 50% to fixed income investments (such as debt instruments including global government bonds, global corporate bonds and cash) with the aim of mitigating the risk of capital losses. The fund will have an exposure of up to 35% in higher risk fixed income investments, such as high-yield (also known as sub-investment grade) bonds. The fund aims to mitigate the risk of capital losses, but an investor may not get back the full amount invested. The remainder will be invested in other investment types such as cash and derivatives.

Investment Process: The fund is actively managed without reference to a benchmark.

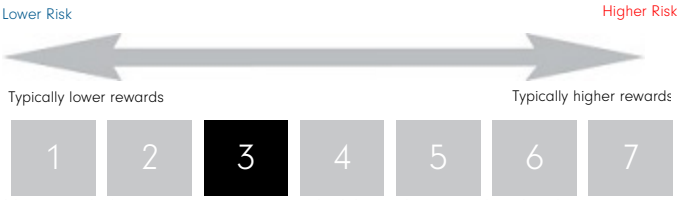

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Additional information: Income from the fund is either paid out to you or it is used to buy you more shares in the fund.

Shares can usually be bought and sold each business day of the fund.

The fund's long-term performance can be compared to the SONIA (Sterling Overnight Index Average) Index ("the SONIA Index") + 2%. The SONIA Index reflects the average of interest rates that banks pay to borrow Sterling overnight from other financial institutions. The Investment Manager believes that this reflects the outcome that could be expected as a result of investing in line with the Fund's investment policy over the long term. The SONIA Index +2% is not a target of the Fund and the Investment Manager does not aim to specifically achieve this outcome, it is solely a comparator benchmark against which investors may compare the Fund's performance.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 3 because, in accordance with the investment policy, the value of the investments may fluctuate slightly. Consequently, both the expected return and the potential risk of loss may be moderate.

Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.

There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.

The fund may be exposed to the risk of financial loss if a counterparty used for derivative instruments subsequently defaults.

Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.

Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

Fidelity INTERNATIONAL

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.24%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

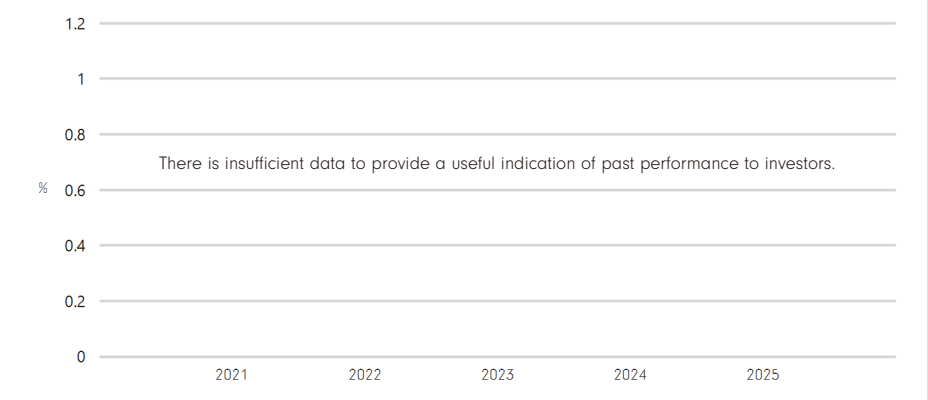

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund and the class were launched on 13 May 2025.

Past performance has been calculated in GBP.

Practical Information

Depositary: JP Morgan Europe Limited.
