Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Europe ex UK Equity Fund

a sub-fund of Fidelity Investment Funds VIII

Fidelity Europe ex UK Equity Fund Accumulation Shares (ISIN:GB00BKS6CB48)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The fund aims to increase the value of your investment over a period of 5 years or more.

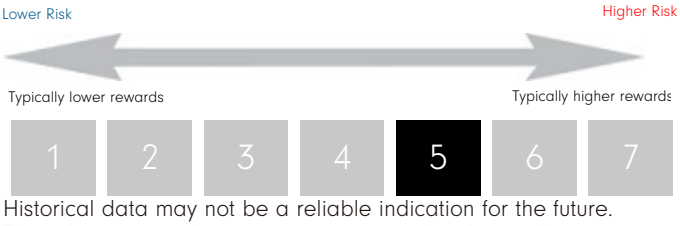

Investment Policy: The fund will provide at least 80% exposure to equities or equity related securities of companies (those domiciled, incorporated, having significant business or listed) in Europe excluding the United Kingdom ("Europe ex-UK"). The fund typically seeks to gain exposure mainly by investing indirectly in other funds (including those operated by Fidelity), which may be index-tracking or actively managed, alongside direct investments. The fund may use derivatives for efficient portfolio management purposes or investment purposes and may hold liquid instruments. The fund may also invest in transferable securities, exchange traded funds, money market instruments, cash and deposits.

Investment Process: The fund is actively managed without reference to a benchmark.

Derivatives and techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment. The fund may also use derivatives with the aim of achieving the investment objective.

Additional Information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The typical investor in the fund will be a sophisticated investor. The fund's performance can be compared to the MSCI Europe ex-UK EUR (Net Total Return) Index.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average.
