

Strategy, Objective And Investment Policy

Strategy: The fund applies an opportunistic approach looking for companies across the market cap spectrum, but with a particular emphasis on the small- and mid-cap universe of stocks, with below average valuations and above average quality. The strategy has an emphasis on a margin of safety that has historically delivered lower absolute volatility and less downside risk, while still capturing significant upside. In order to obtain an investment edge, the portfolio managers have developed a process that seeks to build an out-of-consensus view on fundamentals and emphasize companies with characteristics that skew the outcome of future returns more favourably. They are rigid in adhering to this approach, yet flexible where it is applied, so as to emphasize companies with the best risk/reward profile in any given market environment.

Objective: The fund aims to achieve capital growth over the long term.

Investment Policy: The fund will invest at least 70% of its assets in equities of companies of any capitalisation from anywhere in the world. The fund aims to invest in equities that the investment manager considers are undervalued and offer prospects for growth. The fund may invest in the following assets according to the percentages indicated: China A and B shares (directly and/or indirectly): less than 20% (in aggregate) Emerging markets (including China): up to 20% REITs: up to 20% Money market instruments: up to 20%

Fund And Share Class Facts

Fund launch date:	13.03.24
Portfolio manager:	Morgen Peck, Samuel Chamovitz
Appointed to fund:	13.03.24, 13.03.24
Fund size:	\$ 45m
Number of positions in fund:	538
Fund reference currency:	US Dollar (USD)
Fund domicile:	Luxembourg
Fund legal structure:	SICAV
Management company:	FIL Investment Management (Luxembourg) S.à r.l.
Capital guarantee:	No
Share class launch date:	13.03.24
NAV price in share class currency:	12.48
Share class ISIN:	LU2755903395
Share Class SEDOL:	BRK48B7
Share class WKN:	A404J2
Bloomberg:	FIDGVLX LX
Dealing cut-off:	15:00 UK time (normally 16:00 Central European Time)
Distribution type:	Accumulating
Ongoing Charges Figure (OCF) per year:	1.95% (30.04.25)
OCF takes into account annual management charge per year:	1.50%
Market index from 13.03.24:	MSCI World Small Cap (Net)
Active Money:	91.1%
Recommended Holding Period:	5.0 Years

Other share classes may be available. Please refer to the prospectus for more details.

Risk Indicator

Complete information on risks can be found in the Prospectus.

Important Information

The value of your investment may fall as well as rise and you may get back less than you originally invested. Funds are subject to charges and expenses. Charges and expenses reduce the potential growth of your investment. This means you could get back less than you paid in. The costs may increase or decrease as a result of currency and exchange rate fluctuations. Please refer to the Prospectus and KID of the fund before making any final investment decisions. Investments in emerging markets can be more volatile than other more developed markets. This fund invests in overseas markets and so the value of investments can be affected by changes in currency exchange rates. This fund invests in a relatively small number of industries, sectors, issuers, or within a limited geographical area and so may carry more risk than funds that are more diversified. This fund uses financial derivative instruments for investment purposes, which may expose the fund to a higher degree of risk and can cause investments to experience larger than average price fluctuations. This fund invests directly in property, which can be difficult to sell and the value is generally a matter of opinion rather than fact. When referring to sustainability-related aspects of the promoted fund, the decision to invest should take into account all characteristics or objectives of the promoted fund as detailed in the Prospectus. Information on sustainability-related aspects is provided pursuant to SFDR at <https://www.fidelity.lu/sfdr>.

Performance

Past performance does not predict future returns. The fund's returns may increase or decrease as a result of currency fluctuations. Market index is for comparative purposes only unless specifically referenced in the Objectives & Investment Policy. The same index is used in the positioning tables on this factsheet. Index performance shown in the charts below prior to the effective date of the current index (see Fund & Share Class Facts section) relates to the previous index/indices used. Further details on these indices may be found in the annual reports and accounts.

Performance for calendar years in USD (%)

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025

May	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026
Fund	-	-	-	-	-	-	-	-	2.0	19.3
Index	-	-	-	-	-	-	-	-	7.2	34.1

Cumulative performance in USD (rebased to 100)

Performance is shown for the last five years (or since launch for funds launched within that period). Source of fund performance is Fidelity. Performance is excluding initial charge. Basis: nav-nav with income reinvested, in USD, net of fees. Market indices are sourced from RIMES and other data is sourced from third-party providers such as Morningstar. The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset owned by the fund.

Performance to 31.05.26 in USD (%)

	1m	3m	YTD	1yr	3yr	5yr	Since 13.03.24*
Fund cumulative growth	2.6	1.0	8.1	19.3	-	-	24.8

Glossary / additional notes

Portfolio Turnover Rate (PTR=30.04%) and Portfolio Turnover Cost (PTC=0.04%), where shown: SRDII does not define a methodology for these values; ours is as follows: **PTR** = (purchases of securities + sales of securities) minus (subscriptions of units + redemptions of units), divided by average fund value over the prior 12 months multiplied by 100. Any funds' trading in Fidelity Institutional Liquidity Funds is excluded from the PTR calculation. **PTC** = PTR (capped at 100%) x transaction cost, where transaction cost is calculated as ex-post (i.e. prior 12 months) MiFID disclosure of portfolio transaction costs minus implicit costs.

Volatility & Risk

Annualised volatility: a measure of how variable returns for a fund or comparative market index have been around their historical average (also known as "standard deviation"). Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk. The calculation is the standard deviation of 36 monthly returns presented as an annualised number. Volatility for funds and indices are calculated independently of each other.

Relative volatility: a ratio calculated by comparing the annualised volatility of a fund to the annualised volatility of a comparative market index. A value greater than 1 indicates the fund has been more volatile than the index. A value less than 1 shows the fund has been less volatile than the index. A relative volatility of 1.2 means the fund has been 20% more volatile than the index, while a measure of 0.8 would mean the fund has been 20% less volatile than the index.

Sharpe ratio: a measure of a fund's risk-adjusted performance, taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate. The ratio is calculated by subtracting the risk-free return (such as cash) in the relevant currency from the fund's return, then dividing the result by the fund's volatility. It is calculated using annualised numbers.

Annualised alpha: the difference between a fund's expected return (based on its beta) and the fund's actual return. A fund with a positive alpha has delivered more return than would be expected given its beta.

Beta: a measure of a fund's sensitivity to market movements (as represented by a market index). The beta of the market is 1.00 by definition. A beta of 1.10 shows that the fund could be expected to perform 10% better than the index in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the fund could be expected to perform 15% worse than the market return during up markets and 15% better during down markets.

Annualised tracking error: a measure showing how closely a fund follows the index to which it is being compared. It is the standard deviation of the fund's excess returns. The higher the fund's tracking error, the higher the variability of fund returns around the market index.

Information ratio: a measure of a fund's effectiveness in generating excess return for the level of risk taken. An information ratio of 0.5 shows the fund has delivered an annualised excess return equivalent to half the value of the tracking error. The ratio is calculated by taking the fund's annualised excess return and dividing it by the fund's tracking error.

R²: a measure representing the degree to which a fund's return can be explained by the returns of a comparative market index. A value of 1 signifies the fund and index are perfectly correlated. A measure of 0.5 means only 50% of the fund's performance can be explained by the index. If the R² is 0.5 or lower, the fund's beta (and therefore its alpha too) is not a reliable measure (due to a low correlation between fund and index).

Historic yield

The historic yield for a fund is based on its dividends declared over the preceding 12 months. It is calculated by summing the dividend rates declared in that period, divided by the price as at the date of publication. Declared dividends may not be confirmed and may be subject to change. Where 12 months of declared dividend data does not exist a historic yield will not be published.

Sector/industry classification

GICS: The Global Industry Classification Standard is a taxonomy mainly used across MSCI and S&P indices in which each company is assigned by its principal business activity to one of 11 sectors, 24 industry groups, 69 industries and 158 sub-industries. More information is available at <http://www.msci.com/gics>

ICB: The Industry Classification Benchmark is a taxonomy mainly used across FTSE Russell indices in which each company is assigned by its principal business activity to one of 11 industries, 20 supersectors, 45 sectors and 173 subsectors. More information is available at <https://www.ftserussell.com/data/industry-classification-benchmark-icb>

TOPIX: Tokyo Stock Price Index, commonly known as TOPIX, is a stock market index for the Tokyo Stock Exchange (TSE) in Japan, tracking all domestic companies of the exchange's First Section. It is calculated and published by the TSE.

IPD means the Investment Property Databank who are a provider of performance analysis and benchmarking services for investors in real estate. IPD UK Pooled Property Funds Index - All Balanced Funds is a component of the IPD Pooled Funds Indices which is published quarterly by IPD.

PNAV: Performance Net Asset Value enables calculation of how a fund would have hypothetically performed if its valuation point had been aligned with the index. It is calculated at the month end by revaluing fund assets using market-closing prices to align with the index, standard WM/Reuters closing FX rates (fixed at 16.00 UK time) to align with the index, and stripping out any adjustments resulting from Fidelity International's fair value or swing pricing policies. This simulated performance is for illustrative purposes only. No client dealing takes place using PNAV.

Ongoing charges

The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund's financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (eg amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published.

The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depositary fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges (including details of the fund's financial year end), please consult the charges section in the most recent Prospectus.

Primary share class: is identified by Morningstar when the analysis calls for only one share class per fund to be in the peer group. It is the share class Morningstar recommends as the best proxy for the portfolio for the relevant market and category/GIF combination. In most cases the share class chosen will be the most retail version (based upon actual management charge, inception date, distribution status, currency and other factors) unless a share class that is less retail focused has a much longer track record. It is different to the oldest share class data point in that it is on an available for sale level and not all markets will have the oldest share class for sale in that region. The Primary share class is also based on category so each available for sale/category combination for the fund will have its own primary share class.

Important Information

This is a marketing communication. This information must not be reproduced or circulated without prior permission.

Fidelity only offers information on products and services and does not provide investment advice based on individual circumstances, other than when specifically stipulated by an appropriately authorised firm, in a formal communication with the client.

Fidelity International refers to the group of companies which form the global investment management organisation that provides information on products and services in designated jurisdictions outside of North America. This communication is not directed at, and must not be acted upon by persons inside the United States of America and is otherwise only directed at persons residing in jurisdictions where the relevant funds are authorised for distribution or where no such authorisation is required.

Unless otherwise stated all products are provided by Fidelity International, and all views expressed are those of Fidelity International. Fidelity, Fidelity International, the Fidelity International logo and F symbol are registered trademarks of FIL Limited. Research professionals include both analysts and associates. The performance figures shown do not take into account the fund's Initial Charge. If you took an initial charge of 5.25% from an investment, this is the equivalent of reducing a growth rate of 6% per annum over 5 years to 4.9%. This is the highest initial charge applicable, if the initial charge you pay is less than 5.25%, the impact on the overall performance will be less.

Fidelity Funds 2 "FF2" is an open-ended investment company (UCITS) established in Luxembourg with different classes of shares. FIL Investment Management (Luxembourg) S.a.r.l reserves the right to terminate the arrangements made for the marketing of the sub-fund and/ or its shares in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU. Prior notice of this cessation will be made in Luxembourg.
