The Fidelity Institutional Liquidity Fund FPL has three existing funds: the US$ Fund, the Sterling Fund and the Euro Fund ("the Fund"). Each Fund’s investment objective is to invest in a diversified range of short-term instruments with the aim of maintaining capital value and liquidity whilst producing a return to the investor in line with money market rates. The weighted average maturity is expected not to exceed 60 days.

Objectives & Investment Policy

- The fund aims to maintain capital value and liquidity while producing a return for investors in line with money market rates.
- The fund invests in a diversified range of short-term instruments, including high-quality money market instruments (including government securities, bank obligations, commercial paper and other short-term obligations), high-quality securitisations and asset-backed commercial paper, deposits, repurchase agreements and reverse repurchase agreements, and units or shares in eligible money market funds.
- Investments will have a credit quality consistent with maintaining Moody’s Aaa-mf rating and a rating of AAAm by Standard & Poor’s for the Fund. Such ratings were solicited by the manager of the fund and financed by either the manager or the fund.
- Income is accumulated in the share price.
- Shares in the fund can be bought and sold on any day on which the banks are open for normal banking business in London and same day settlement of the proceeds for subscriptions and redemptions is facilitated by electronic funds transfer.
- The fund is a Low Volatility Net Asset Value Money Market Fund and operates as a Short-Term Money Market Fund.

Quarterly Commentary

The political atmosphere in the UK remained volatile as the new Prime Minister Boris Johnson suspended parliament for more than a month before Brexit. Subsequently, 10-year Gilt yields fell below 0.5%, lower than its previous August 2016 trough, which came after the Bank of England (BoE) slashed interest rates to an all-time low following the Brexit vote. However, the decision to suspend Parliament was later overturned by the Supreme Court. On the economic front, the manufacturing downturn in the UK continued in September, as the Purchasing Managers’ Index (PMI) indicated a contraction for the fifth month in a row. Levels of output, new orders and new export business fell further, while those for stocks of purchases rose as some companies started to rebuild their inventories ahead of the 31 October Brexit deadline. On the policy front, the BoE kept interest rates on hold at 0.75% and signalled that prolonged Brexit uncertainty will keep interest rates lower for longer. The Fund continues to focus on high quality issuers, with about 46% invested in entities rated Aa5 or higher. The fund’s weighted average maturity was marginally decreased to 42 days.

Important Information

The use of financial derivative instruments may result in increased gains or losses within the fund. The investment policy of this fund means it invests mainly in other funds or invests mainly in units in collective investment schemes. The value of shares may be adversely affected by insolvency or other financial difficulties affecting any institution in which the Fund’s cash has been deposited. A Money Market Fund (MMF) is not a guaranteed investment. Investment in an MMF is different from an investment in deposits. The principal invested may fluctuate, and the risk of loss of the principal is to be borne by the investor. The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share.
Past performance is not a reliable indicator of future results. The fund's returns can be affected by fluctuations in currency exchange rates.

Glossary / additional notes

**Ongoing charges**

The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund’s financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (e.g., amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published.

The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depository fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges.

It excludes performance fees (where applicable), portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges (including details of the fund’s financial year end), please consult the charges section in the most recent Prospectus.

**Historic yield**

The historic yield for a fund is calculated based on the average of the last 30 days of annualised yields.
Important Information

This document, including the information in it, is intended only for investment professionals to whom it may lawfully be distributed and should not be passed to private investors. This document may not be reproduced or circulated without prior permission. FIL Limited was established over 40 years ago and provides asset management services to investors outside North America. Reference to Fidelity means FIL Limited and its respective subsidiaries form the global investment management organisation that is commonly referred to as Fidelity International.
