

Strategy

The Fidelity Institutional Liquidity Fund PLC has four existing funds: The USD Fund, the Sterling Fund, the Euro Fund and the United States Dollar Treasury Fund ("the Fund"). Each Fund's investment objective is to invest in a diversified range of short-term instruments with the aim of maintaining capital value and liquidity whilst producing a return to the investor in line with money market rates. The weighted average maturity is expected not to exceed 60 days.

Objectives & Investment Policy

Objective: The fund aims to maintain capital value and liquidity whilst producing a return to the investor in line with money market rates.

Investment Policy: The fund invests at least 99.5% in US Treasury obligations (which are money market instruments issued or guaranteed by the US Treasury and payments of principal and interest thereon which are backed by the full faith and credit of the US government), reverse repurchase agreements secured by such instruments and cash (including deposits).

Investment Process: Investments will have a credit quality consistent with maintaining Moody's Aaa-mf rating and a rating of AAAm by Standard & Poor's for the fund. Such ratings were solicited by the manager of the fund and financed by either the manager or the fund.

Benchmark: N/A. The fund is actively managed without reference to a benchmark.

Risk Indicator

The risk indicator assumes you keep the product for 0.5 years. The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 1 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you. Returns may increase or decrease as a result of currency fluctuations. This product does not include any protection from future market performance so you could lose some or all of your investment. If FIL Investment Management (Luxembourg) S.A. is not able to pay you what is owed, you could lose your entire investment.

Important Information

The use of financial derivative instruments may result in increased gains or losses within the fund. The investment policy of this fund means it invests mainly in other funds or invests mainly in units in collective investment schemes. The value of shares may be adversely affected by insolvency or other financial difficulties affecting any institution in which the Fund's cash has been deposited. A Money Market Fund (MMF) is not a guaranteed investment. Investment in an MMF is different from an investment in deposits. The principal invested may fluctuate, and the risk of loss of the principal is to be borne by the investor. The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share. Funds are subject to charges and expenses. Charges and expenses reduce the potential growth of your investment. This means you could get back less than you paid in. The costs may increase or decrease as a result of currency and exchange rate fluctuations. Please refer to the Prospectus and KID of the fund before making any final investment decisions. When referring to sustainability-related aspects of a promoted fund, the decision to invest should take into account all characteristics or objectives of the promoted fund as detailed in the prospectus.

In line with regulatory requirements, performance data will be shown when this share class has been running for 12 months.

Glossary / additional notes

Ongoing charges

The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund's financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (eg amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published.

The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depositary fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges.

It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges (including details of the fund's financial year end), please consult the charges section in the most recent Prospectus.
