Investment Objective

The fund aims to provide income whilst maintaining an average duration of investments not exceeding three years. The fund invests at least 70% of its assets, in debt securities including investment grade corporate bonds and government bonds of varying maturities, below investment grade and emerging market bonds, from anywhere in the world and denominated in various currencies. The fund may also invest in money market instruments and/or other short term debt instruments including certificates of deposit, commercial paper and floating rate notes, cash and cash equivalents. The fund may invest in the following assets according to the percentages indicated:

- below investment grade debt securities: up to 50%
- investment grade debt securities: at least 50%
- Listed China onshore debt securities (directly and/or indirectly): less than 30% (in aggregate).

The portfolio seeks to maintain an overall average credit rating of investment grade. (For full details of the objective and other considerations please refer to the Prospectus)

Definition of Terms

Annualised Volatility is a measure of how variable returns for a fund or comparative market index have been around their historical average. Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk.

Sharpe Ratio is a measure of a fund's risk adjusted performance taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate.

Yield to Maturity is the internal rate of return earned on a bond, assuming that the bond will be held until maturity and all coupon and principal payments will be made. It is an estimation of future return, as the rate at which coupon payments can be reinvested when received is unknown.

Running Yield describes the income investors get from their portfolio as a percentage of market value of the securities (incorporating the effect of derivatives) and does not include the impact of fees. It should not be relied on as a measure of expected fund return. The running yield does not reflect the total return over the life of the bond and takes no account of reinvestment risk or the fact that bonds usually mature at par value.

Duration is a measure of sensitivity of the fund value to changes in interest rates and includes all investments in the fund including derivatives. It takes into account that expected cash flows will fluctuate as interest rates change and affect a bond's price.

Average Credit Rating is the weighted average of all the bond credit ratings in the fund. It takes into account all investments in the fund including derivatives. This measure gives an idea of how risky the fund's bonds are overall: the lower the average credit rating, the riskier the fund. With a Linear weighted average the weight assigned to each issue is equal to its market value weight.

The percentage of TNA exposure in the Top 10 Holdings table, Geographic & Sector Exposure charts, Credit Rating & Currency Exposure tables exclude derivatives. Geographic exposure basis is domicile of issuer. Currency exposure is after hedging.

Credit Rating Exposure table: For each bond in the fund, Fidelity looks at the rating given by three rating agencies (S&P, Moody's and Fitch) and applies the worst of the two best ratings (commonly known as the Basel method). The AAA/Aaa rating is the highest and indicates the borrower has the lowest probability of defaulting on its debt. The table above is a categorisation of the fund's individual bonds into their credit ratings. If any derivatives are being used to adjust the credit quality of the fund, these are reflected in the Average Credit Rating under the "Measures" section.

FIL Investment Management (Singapore) Limited [FIMSL] (Co. Reg. No.: 199006300E) is a responsible entity for the fund in Singapore. Prospectus of the fund is available from FIMSL or its distributors upon request. Potential investors should read the prospectus before investing. All views expressed and references to specific securities are included for illustration only, and should not be construed as an offer or recommendation. This document is for information only and does not have regard to the specific investment objectives, financial situation and particular needs of the person who may receive it. Potential investor should seek advice from a financial adviser before investing. If that potential investor chooses not to seek advice from a financial adviser, he should consider whether the fund is suitable for him. Past performance of the fund is not indicative of the future performance. Prices can go up and down. The value of the shares of the fund and the income accruing to them may fall or rise. Investors investing in a fund denominated in a non-local currency should be aware of exchange rate risk. The fund is not available to US citizens, residents or greencard holders. This publication has not been reviewed by the Monetary Authority of Singapore. Fidelity, Fidelity International, and the Fidelity International logo and F symbol are trademarks of FIL Limited.

ESG Metrics

ESG refers to 'environmental, social and governance' criteria which are three central factors used in measuring the sustainability of an investment in securities of an issuer. By way of example, "environmental" may cover themes such as climate risks and natural resources scarcity, "social" may include labour issues and product liability risks such as data security and "governance" may encompass items such as business ethics and executive pay.

The factsheet is a snapshot of the portfolio at the date indicated above. ESG ratings distribution may vary over time. The portfolio manager may use MSCI ESG ratings or Fidelity ESG ratings as part of investment decisions. Product-specific information can be found on your local Fidelity website which can be accessed via the following link <https://www.fidelityinternational.com> (Products & services) by selecting your country of residence.

Representation of this data (including the distribution of MSCI ESG Ratings) is for informational purposes only.

Sustainability Characteristics

	Fund
MSCI ESG Fund Rating (AAA-CCC)**	A
Weighted Average Carbon Intensity (tCo2e/\$M Revenue)**	136.9
SFDR Classification	8

The calculations are not comprehensive. The metric says nothing about how the portfolio contributes to a low-carbon society. N/A will be displayed if there is no ESG data available for the fund/index or if the coverage of underlying securities is under 50%.

**ESG Fund rating based on holdings as at 31.03.25 with 73.3% security coverage.

Carbon intensity data based on holdings as at 31.05.25 with 70.4% security coverage.

*NR - Not rated

MSCI ESG Ratings Distribution

Glossary

MSCI ESG Fund Rating: This shows the fund's ESG rating based on the Quality Scores given to the fund by MSCI. This ranges from AAA, AA (Leader), A, BBB, BB (Average) to B, CCC (Laggard).

Weighted Average Carbon Intensity: Provides a snapshot of the fund's exposure to carbon-intensive companies. Greenhouse gas emissions are based on portfolio weights, rather than ownership share, to allow for comparison across multiple asset classes. The smaller the value shows, the lower the greenhouse gas emissions.

SFDR Classification: Shows the latest available classification given to each fund as part of the EU Sustainable Finance Disclosure Regulation (SFDR). Article 9 funds have sustainable investment as their objective and promote environmental or social characteristics. Article 8 funds promote environmental or social characteristics, but do not have a sustainable investment objective. Article 6 funds integrate sustainability risks (unless specified otherwise in the prospectus) into investment analysis and decision-making, without the funds promoting environmental or social characteristics or having sustainable investments as their objective. Information on sustainability-related aspects is provided pursuant to SFDR at <https://www.fidelity.lu/sfdr>.

MSCI ESG Ratings Distribution: This shows the percentage distribution of ESG ratings in the fund, based on the Net Asset Value of holdings excluding cash, liquidity funds, derivatives and Exchange Traded Funds.
